

## **Cleaning recommendations**

- Wash before first use.
- Daily cleaning-handwash or dishwasher (top rack only).
- No use of abrasive cleaning tools or soaps.

## **Storage recommendations**

- We recommend allowing your bags to fully dry out and then securing the clamp when storing. These can either stand up if you have the space or if you push the air out of them they can also lay down.

## **Caution**

- Using in microwave without removing the clasp – product will explode
- turning it in-side- out.
- Writing on bags with permanent marker (most ball point pens are fine).
- Puncturing the silicone with a pen.
- Writing on bags with any material and then exposing them to heat (ink will become permanently baked onto the product). This includes but is not limited to putting them into the dishwasher.
- Sliding the closure the wrong way and it becoming stuck or the bag incurring damage – there are arrow indicators to properly close these.
- Mold – this is due to improper cleaning/storage exceeding the advised temperature thresholds.
