

State-of-the-Art Cookware

Leading the way in cookware innovation, Saladmaster plays a key role in delivering healthy solutions to customers worldwide.

Saladmaster is a global leader in cookware innovation dedicated to helping people learn how proper cookware plays an essential role in nutritional cooking and healthy living with the most advanced nutritional cooking system available. Saladmaster cookware is vital in maintaining the essential natural nutrients in food throughout the cooking process.

Saladmaster takes pride in the millions of dollars invested for research of materials and advanced technology to bring innovative products to market that are engineered and designed with purpose, and for a lifetime of use.

Throughout its 70 year history, Saladmaster products are made in the U.S.A. by U.S. manufacturer and parent company Regal Ware, Inc.

Saladmaster sets the global standard for technology, benefits, quality, value, and integrity.

In 2008 Saladmaster introduced 316Ti Stainless Steel with Titanium in its cookware construction. As the leading innovator, Saladmaster offers products made from top quality metal developed to bring a clean, pure and safe method of cooking to families.

The technology used in the Saladmaster nutritional cooking system is recognized and respected in the medical field for their high performance and durability. Saladmaster provides the maximum resistance to chemical reactions with salts, acids, and alkalis in the food being prepared. This ensures that the food being cooked in Saladmaster contains no metal by-products from chemical reactions with metals in the cooking process.

As a leader in the industry, Saladmaster continues to actively move forward with major investments in research, development and advanced technology to deliver the next generation of cookware.
