

Usage Recommendations

- Scrubbers - For use on interior of cookware only as specified by Saladmaster (detailed under misuse). While the scrubber is a great tool for removing stubborn stains, it should not be used on the exterior surfaces of your cookware and covers, as it may scratch and dull the finish.
- Towel – Safe for any surface.
- Scrub brush – Both heads are safe to use on interior and exterior of pan.

Misuse

Scrubbers

- This item can affect the interior of cookware if used improperly.
 - Impact to the cookware from using these products is not covered under the warranty.
 - Engineering tests indicate that if excessive/heavy pressure is placed on the scrubber, it can cause minor scratching to the pan (pictures depicting excessive/heavy pressure below).

Scrub Brush

- Improperly attaching or applying too much pressure when attaching the two heads can result in the fasteners to break.
- Applying too much pressure during usage can result in the heads not properly securing to the handle.
- Applying excessive pressure to the silicone button can cause the silicone to stretch/lose its function.
- Exposing this product to heat can result in melting.

Microfiber Towel

- For best results...
 - Hand wash in cold/room temperature water using minimal soap (one to two teaspoons).
 - Avoid using harsh detergents and fabric softeners air dry.
